EASY-FORM™ PURLIN TAPE

CLOSED CELL POLYETHYLENE FOAM ROD TAPE

Properties

Easy-Form™ Purlin Tape is a closed cell, electron beam crosslinked polyolefin foam with self wound adhesive backing. It incorporates Softlon® foam with an acrylic transfer tape.

Features

- Softlon® has an outer skin on both faces, and exhibits consistent thickness and density
- The acrylic-based adhesive provides good holding power with no long-term deterioration
- Self wound for easy use, and roll stability
- The foam is free of heavy metals, plasticisers and CFC's.

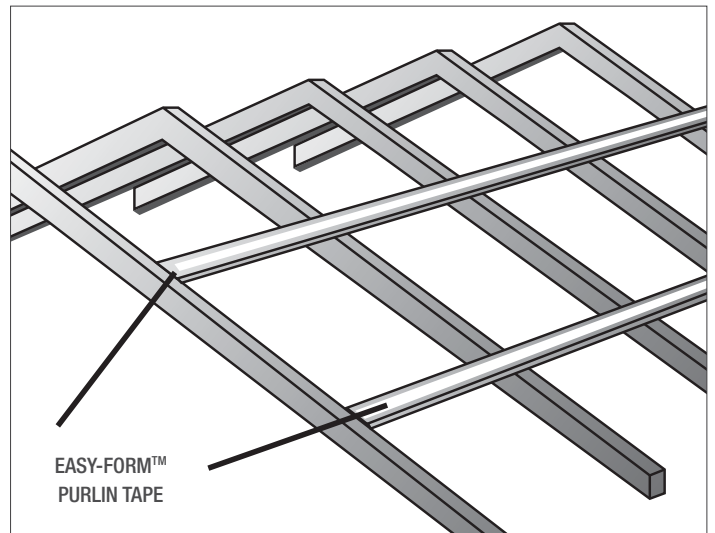

Surface Preparation

It is essential, as with all pressure sensitive tapes, that the surface, to which the tape is applied, be clean and free of grease and oil. Suitable cleaning solvents are acetone and methylated spirits.

Applications

- For use on purlins, battens or noggings
- Easy to install
- Reduces thermal movement noises
- Eliminates the creaking noises from the effect of expansion and contraction
- For effective use on houses, sheds, warehouses, garages and patios
- Crosslinked PE foam
- Adhesive one side

This information on Sekisui Foam Australia foams is presented to the best of our knowledge. All product data is based on average values and is for guidance only. As these products are subject to constant research and development, we reserve the right to update the contents without notice. Date of Publication: February 2015.

Recommendations as to methods of post fabrication, application and use of Sekisui Foam Australia foams are based on our experience and knowledge of the characteristics of our products and are given in good faith. As producer of the material we have no control over the application of Sekisui Foam Australia foams and no legal responsibility is accepted for such recommendations.
